

DelegasiKu — Product Requirements Document (Brief)

Product: DelegasiKu — Verified Delegation Platform

Version: MVP (Competition)

Date: September 2026

1. What is DelegasiKu?

DelegasiKu turns a verified identity ([e.id](#)) into a **case-specific, expiring, and revocable authorization** to act for someone else.

One-liner: KYC tells us WHO you are. DelegasiKu tells us WHETHER you're allowed to act here, for this, right now.

2. The Problem

Organizations see a representative's ID (KTP copy, letter, chat) but **cannot know if they're currently authorized** for a specific case. Static documents can't be revoked or checked in real time.

3. Target Users

User	Role	Need
Organization Admin	Creates delegation	Bind representative to one case, one action, one expiry
Representative	Gets verified via e.id	Accept exact scope, get QR proof
Checker/Officer	Scans QR	See current status: ACTIVE / REVOKED / EXPIRED

Paying customers: Government units, permit operators, enterprises, consultants.

4. Key Features (MVP)

1. **Create delegation** — One case, one action, one validity period
 2. **e.id verification** — Representative proves identity via [e.id](#) wallet
 3. **QR/link proof** — Public page shows current status
 4. **Instant revocation** — Same QR shows REVOKED immediately
 5. **Audit trail** — See all delegation history
-

5. How It Works (5 Steps)

CREATE VERIFY ACCEPT CHECK REVOKE

1. **Create:** Organization admin creates delegation for specific case + action
 2. **Verify:** Representative scans QR, verifies via [e.id](#), accepts scope
 3. **Check:** Anyone scans QR sees ACTIVE / REVOKED / EXPIRED + minimal info
 4. **Revoke:** Organization clicks button same QR instantly shows REVOKED
-

6. [e.id](#) Integration

Layer	Who	What
Identity	e.id	Verifies WHO the person is (KYC, credentials)
Authorization	DelegasiKu	Verifies WHAT they may do, for which case, until when

Boundary: DelegasiKu does NOT do KYC or issue [e.id](#) credentials. We consume [e.id](#) verification and add the delegation workflow layer.

7. Success Metrics (MVP)

- ☐ Complete delegation flow works in < 3 minutes
- ☐ QR proof shows correct status (ACTIVE/REVOKED/EXPIRED)
- ☐ Revocation updates same QR instantly
- ☐ No NIK or personal data stored (only cryptographic reference)

8. Non-Goals (MVP)

- Legal power of attorney
- Multiple industries/templates
- Native mobile app
- Payments/billing
